

This product is only suitable for items that use 1 amp or less. Please check the manufacturer's power usage before connecting the SavaSocket Mobile.

Step 1: Plug SavaSocket Mobile into the wall socket and then plug in your charger. The red LED light indicates it is charging.

Step 2: When your item is fully charged the SavaSocket Mobile will switch the power supply to the charger off and the red light will go out indicating the process is complete.

To charge another device plug in the next charger and press the button on the SavaSocket Mobile to start the charge monitoring process again. Note: It may take up to 10 minutes before charging commences.

Trouble shooting

If the SavaSocket Mobile appears not to be working properly it can be reset – plug your charger into the SavaSocket Mobile and connect to the power supply. Do not connect the power lead to your item to be charged yet. Press the button and hold for 3 seconds. The red LED will flash quickly for up to a minute to indicate it is in the resetting mode. Once the light starts to flash slower you can connect the power cable to the item to be charged.

Technical Specification

Rated Voltage: 240VAC 50Hz

Power Consumption: 0.02W

Charger Rating: 240VAC 50Hz, 1A
20W Max

Maximum current: 1 Amp
